\*CAGR: compounded annual growth rate

\*\*EBIT: earnings before interest and taxes

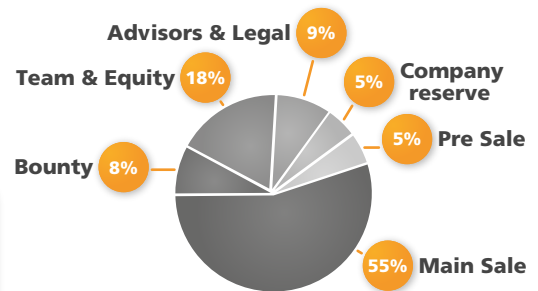

## UnitedCrowd TOKEN

We create a utility token with a deflation mechanism as suggested by Vitalik Buterin. We will not offer short-term returns in the form of interests or dividends. Instead our token-holders are rewarded by a token repurchase program, we buy back UCT monthly and burn these tokens. Also, UCT come with a voting right and the UnitedCrowd-Token will be listed at token exchanges for trading.
